

# Steel Edge Doors Contain Extra Features...

**Polyurethane Insulation:**  
Doors are fully insulated with an inner core of environmentally friendly polyurethane foam. Provides energy efficiency and reduces noise.

**Steel Edge Construction:**  
A full steel edge adds greater strength and durability. There are no wood edges to rot, warp, split or bow. Steel edge doors maximize the security of your home. All steel edge doors have a 90-minute fire rating, meeting the requirements of ASTM E-152.

**Low Maintenance PF Composite:**  
Poly-Fiber door frame is moisture, rot and insect resistant. Will never warp, splinter or rot like traditional wood. Optional finishes available.

**Perimeter Weatherstrip:**  
A continuous strip of magnetic weatherstrip seals the top and side of the door with the frame. A foam compression weatherstrip completes the seal on the hinge side. Preventing air infiltration around the door.

**Steel Security Plate:**  
Steel security plate reinforces the jamb and deadbolt area for added security. Helps prevent forced entry.

**Composite Reinforced Lock Preparation:**  
Provides rigid base for installation of hardware. Reinforces lock block area for added security. Permits a more uniform foam fill for better insulation, unlike wood lock blocks.

**10-Year Warranty**

24ga Steel

**LIMITED Lifetime WARRANTY**

22ga Steel

**Door Light and Frame:**  
All tempered door lights, clear or decorative are warranted for a lifetime. The frame will not warp from high heat. The insulated tempered glass produces the best energy efficiency.

**Adjustable Hinge:**  
A standard on all 22 gauge steel edge doors. The unique adjustable hinge plate system offers built-in advantages unmatched in the industry. The adjustable hinge plate makes it possible to adjust the door up or down, in or out. Helps maintain door alignment and proper weather seal. **All that's needed is a screwdriver!**

**Door Bottom Seal:**  
The door bottom weatherstrip slides off and on for easy replacement and forms a weather-tight seal to the threshold.

### Elegant Striation

A field of clear Antique glass striations accent a simple antique patina coming in traditional or prairie grid design.

CDR 4S CSL2S CDR 6S CSL3S CDR 8S CSL4S

### Simulated Divided Light

Craftsman SDL with a new wide traditional flat profile provides a handcrafted appearance. Low E is provided for energy efficiency. Matching sidelights are available.

### Rustic Smooth Steel

The Rustic Smooth Steel door provides the same heavy 22-gauge steel construction as the Craftsman doors. The design features a 2-Panel Camber Top with High Definition Planks. The Rustic door is engineered to meet design needs of Southwest, Spanish or Mediterranean style homes. Fullview sidelights with Wrought Iron or Black Patina decorative glass will compliment your home's décor (see decorative glass brochure for details).
